Education

University of Pretoria **Pretoria, Gauteng**
BSc Computer Science Expected November 2026
Relevant Coursework: Systems Architecture, Network Systems, UI/UX Engineering, Data Structures and Algorithms

Labview Core 1 & 2 Midrand, Gauteng
While working at Test Dynamics, I completed Training for Labview Core 1 & 2 as a part of my inhouse training.

Curro Hillcrest Hillcrest, Kwa-Zulu Natal
Core subjects: English Home Language, Mathematics core, Afrikaans First additional, Life orientation Matriculated 2021
Elective subjects: Engineering Graphics & Design, Computer Applications Technology, Consumer Studies

Experience

Test dynamics **Midrand, Gauteng**
Administrative Assistant (Full Time) **September 2022 - February 2023**

- Utilized Sage accounting software to generate formal quotes, invoices, process goods received and purchase orders.
- Prepared, audited, and distributed monthly customer financial statements routinely.

Test dynamics Midrand, Gauteng
Technical & administrative Assistant (Part time) Various times over holidays throughout the years, when needed

- Modernized the company website frontend, improving layout layouts, responsiveness, and visual appeal.
- Audited the product database for the website, systematically adding new items and removing discontinued products to keep the website accurate.

Leadership & Activities

Capstone Project - SpendSense Pretoria, Gauteng
Team Lead February 2026 - Present

- Demo 1 (completed): Built core frontend interfaces using React, TypeScript, and shadcn/ui while co-authoring the formal Software Requirements Specification (SRS).
- Demo 2 (current): Co-engineered the full-stack architecture for the Quiz and Notification modules while writing the Software Architecture Specifications (SAS).

MnR Momentum Life Insurance AI Hackathon Pretoria, Gauteng
Top 100 in Individual Stage, waiting on judging for phase two Present

- Placed in the top 100 after the individual testing phase.
- Spearheaded team for Phase 2, where I authored majority of the technical design proposal, designing a comprehensive system plan that featured a custom FastAPI orchestrator, Supabase Session Tracking, an SQLite vector store, secure user authentication, and role-based RAG grounding .

Skills & Interests

Technical Skills: C++, Java, Python, TypeScript, React, NestJS, Node.js, Computer Networks, Supabase, SQLite, Linux, Git, Figma and Neural networks & AI.
Interests: Web development, Cybersecurity, Running, Granny hobbies (sewing, crocheting, knitting), Photography, Reading, 3d Printing, Baking.
